Look What We Learned

5TH GRADE MATH & SCIENCE

This quarter fifth grade worked with division and number theory & fractions. We are also learning about probability through March Madness brackets. In science, we learned about Earth's interactive systems. We will be working in groups to make our own biospheres.

6TH GRADE MATH & SCIENCE

Sixth grade focused on one-variable equations & inequalities, factors & multiples, and fractions & decimals in math. We are learning about probability through March Madness brackets. In science, we learned all about weather and climate. We will be making our own weather station.

7/8 MATH & SCIENCE

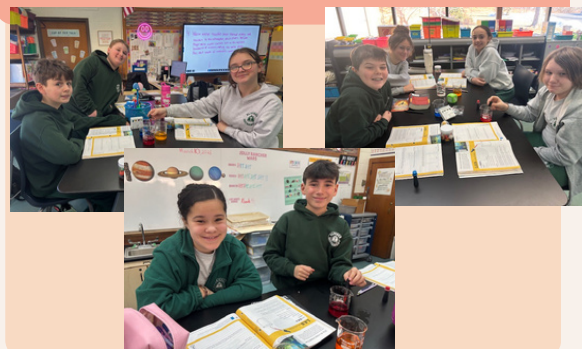

In Math, seventh and eighth grade worked with writing and solving equations with variables and inequalities. We have March Madness brackets to learn about probability. In Science, they learned about life structure and function.
