Technology Newsletter Spring 2025
Mr. Ashley

As we approach the end of the school year, there has been a great deal of development with the Kindergarten and 1st graders. The Kindergarten children have improved their ability to login using a username and password. It can be challenging but it is getting easier for them on both their PC's and Chromebook. They are also gaining familiarity with using a Chromebook and using the touchpad.

2nd grade through 3rd are making progress in Microsoft Word. The projects are advanced but I am seeing great progress. By the time the school year ends they will be far ahead of their peers because they are being taught both the basics as well as some medium level lessons.

4th – 8th are beginning PowerPoint. They will be taught beginner to intermediate skills. The project they will work on will entail them using PowerPoint to tell a story which they will create. This project will also teach the importance of internet safety as they will need to use some online resources to successfully complete the project. They will taught how to navigate the web safely and how and where to find and identify safe websites and resources. The children are very excited about this project. I look forward to seeing what these bright creative minds come up with.

Thank You,
Mr. Ashley
